-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 9, 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Osann – US 6,133,582.

Osann (text in col. 7, line 8 to col. 11, line 47) discloses the claimed invention by increasing the manufacturing yield for a device by testing the number of functioning layers (edge interconnections) of a vertically stacked device with multiple layer die.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osann.

Osann is applied as above and does not disclose to store health data with known good or bad layers. As hospitals and medical devices use computer chips for storing data, it would have been obvious and is reasonable to one of ordinary skill in the art at the time the invention was made to store health data with known good or bad layers to accurately store patient records.

Art Unit: 2891

Claims 8, 10 are objected to as being dependent upon a rejected base claim, but would be allowable (because the prior art does not disclose the bonded semiconductor layers as claimed) if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-17 are allowed because the prior art does not disclose to form a combined die having a number of known good layers at least equal to the predetermined number of known good layers as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Smith - US 2003/0061212 describes analyzing and storing data.
